

Benjamin Sarti

benjamin.sarti@gmail.com • Skype: benjaminsarti • +91 98181-87458 • Nationality: French
Address: 88 Kailash Hills (2d floor), East of Kailash - 110065 New Delhi, India

Objective

French Electrical and General Engineer **holding a Working Holiday Visa for New Zealand** and looking for a full-time job in software development, telecommunications, automation, systems or test engineering.

Experience

Famoco

NEW DELHI, INDIA

IT Support Engineer

Jun. 2016 – Present

- Helping our clients to integrate their Android applications on [NFC](#) readers;
- Developed Android applications to interact with Famoco devices (NFC, connectivity, notifications, ...) for technical support and presales.

CPQD

CAMPINAS, BRAZIL

R&D Engineer

Aug. 2014 – May 2016

- **Optical amplifiers:** simulations with MATLAB and OptiSystem to optimize EDF and Raman amplifiers performance. Laboratory automation with LabVIEW and Matlab for optical characterizations. Used serial, GPIB, ethernet and USB communications to control different processors and measuring instruments. Integration tests (hardware + firmware) using command-line user interfaces.
- **Integrated Tunable Laser Assembly:** built a laboratory setup for automated optical characterization using Python and C. Controlled the integrated lasers through serial port and writing hexadecimal commands in the processor registers. Controlled the measuring instrument (Optical/Electrical Spectrum Analyzers, polarization meters) using PyVISA.
- **Packaging for integrated photonics:** automated DC motors and piezoelectric sensors using Python for free space alignment of polarization multiplexers. The control was done sending hexadecimal commands to the controllers registers through serial port.

Intern

Jul. 2013 – Aug. 2014

Optical networks: implemented [dynamic channels equalization algorithms](#) in C++ on CPqD's testbed and controlled a cascade of optical nodes independently using multithreading. The nodes were controlled using Software Defined Networking and NETCONF protocol. Each node, forming a PII control loop, was constituted of three embedded subsystems (an optical amplifier, an Optical Channel Monitor and a Wavelength Selective Switch) that were controlled by BeagleBords or their own hardware.

Education

Universidade Estadual de Campinas

CAMPINAS, BRAZIL

Master of Electrical Engineering

Jul. 2014 – Dec. 2015

Nonlinear programming, Information theory, Optical links and Probability theory.
Dissertation title: ["Field Calibration Procedure for Enhanced Automatic Gain Control of Distributed Counter-Propagating Raman Amplifiers."](#)

École Centrale Marseille

MARSEILLE, FRANCE

Engineer's Degree (French *Diplôme d'Ingénieur*)

Sept. 2010 – Nov. 2014

Multidisciplinary formation in sciences (Mathematics, Physics); in engineering (Solid and Fluid Mechanics, Heat transfer, Chemistry, Electronics, ...) and in social sciences (Management, Economics, foreign languages,...).

Universidade Estadual de Campinas

CAMPINAS, BRAZIL

Bachelor of Electrical Engineering

Jul. 2012 – Jul. 2014

Telecommunications, Electronics, Control Engineering and Power Engineering.

Embedded systems projects:

- Programmed micro-controllers with Process Expert and Code Warrior. Controlled physical systems using GPIO pins and interruptions.
- Built an digital-to-analog converter using a R-2R ladder and a Raspberry Pi.

Skills

Programming Languages: Python, MATLAB, LabVIEW, Java, XML, C and C++.

Operating Systems: Linux, Windows and Android.

Others: OptiSystem, L^AT_EX, Git, Jira, TestLink, Zoho, MySQL, Confluence, EAGLE, Inventor.

Natural languages: Fluent in English, French and Portuguese. Intermediate in Spanish.

Other competences and interests

Tennis competitions: best [French ranking](#): 15.

Music: 10 years of musical theory formation at [Amnéville City music academy](#) with validation of the 3 first cycles. Has been playing the trumpet for 7 years and was a member of several orchestras.

Others: fitness training, Japanese animations and board games.
