

# Benjamin Sarti

[benjamin.sarti@gmail.com](mailto:benjamin.sarti@gmail.com) • Skype: benjaminsarti • +91 98181-87458 • Nationality: French  
Address: will arrive in Christchurch on June 21st 2017

---

## Objective

French Electrical and General Engineer **holding a Working Holiday Visa for New Zealand** and looking for a job in research and development, automation, systems or test engineering.  
**Industries of interest:** telecommunications, software, energy, electronics, automotive, aerospace.

---

## Experience

### Famoco

NEW DELHI, INDIA

#### IT Support Engineer

June 2016 – June 2017

- Helping our clients to integrate their Android applications on [NFC](#) readers;
- Developed Android applications to interact with Famoco devices (NFC, connectivity, notifications, ...) for technical support and presales.

### CPQD

CAMPINAS, BRAZIL

#### R&D Engineer

Aug. 2014 – May 2016

- **Optical amplifiers:** simulations with MATLAB and OptiSystem to optimize EDF and Raman amplifiers performance. Laboratory automation with LabVIEW and Matlab for optical characterizations and tests. Interacted with several microprocessors and measuring instruments using serial, GPIB, ethernet and USB communications. Integration tests (hardware + firmware) using command-line user interfaces.
- **Integrated Tunable Laser Assembly:** built a laboratory setup for automated optical characterizations and tests using Python and C. Controlled the integrated lasers through serial port sending commands to their microprocessors. Controlled the measuring instruments (Optical/Electrical Spectrum Analyzers, polarization meters) using PyVISA.
- **Packaging for integrated photonics:** automated DC motors and piezoelectric transducers using Python for free space alignment of polarization multiplexers.

#### Intern

Jul. 2013 – Aug. 2014

**Optical networks:** implemented [dynamic channels equalization algorithms in C++](#) on CPqD's testbed and controlled a cascade of optical nodes independently using multithreading. The nodes were controlled using Software Defined Networking and NETCONF protocol. Each node, forming a PII control loop, was constituted of three embedded subsystems (an optical amplifier, an Optical Channel Monitor and a Wavelength Selective Switch) that were controlled by BeagleBords or their own hardware.

---

## Education

### Universidade Estadual de Campinas

CAMPINAS, BRAZIL

#### Master of Electrical Engineering

Jul. 2014 – Dec. 2015

Nonlinear programming, Information theory, Optical links and Probability theory.  
*Dissertation title:* "Field Calibration Procedure for Enhanced Automatic Gain Control of Distributed Counter-Propagating Raman Amplifiers."

École Centrale Marseille

MARSEILLE, FRANCE

**Engineer's Degree (French *Diplôme d'Ingénieur*)**

Sept. 2010 – Nov. 2014

Multidisciplinary formation in sciences (Mathematics, Physics); in engineering (Solid and Fluid Mechanics, Heat transfer, Chemistry, Electronics, ...) and in social sciences (Management, Economics, foreign languages,...).

Universidade Estadual de Campinas

CAMPINAS, BRAZIL

**Bachelor of Electrical Engineering**

Jul. 2012 – Jul. 2014

Telecommunications, Electronics, Control Engineering and Power Engineering.

**Embedded systems projects:**

- Programmed micro-controllers with Process Expert and Code Warrior. Controlled physical systems using GPIO pins and interruptions.
- Built an digital-to-analog converter using a R-2R ladder and a Raspberry Pi.

---

## Skills

**Programming Languages:** Python, MATLAB, LabVIEW, Java, XML, C and C++.

**Operating Systems:** Linux, Windows and Android.

**Others:** OptiSystem, L<sup>A</sup>T<sub>E</sub>X, Git, Jira, TestLink, Zoho, MySQL, Confluence, EAGLE, Inventor.

**Natural languages:** Fluent in English, French and Portuguese. Intermediate in Spanish.

---

## Other competences and interests

**Tennis competitions:** best [French ranking](#): 15.

**Music:** 10 years of musical theory formation at [Amnéville City music academy](#) with validation of the 3 first cycles. Has been playing the trumpet for 7 years and was a member of several orchestras.

**Others:** fitness training, Japanese animations and board games.
